Assignment 3 Milestone 1 Compliance Checklist

Dataset Proposal for CrisisMMD | 7 pages | 4 November 2026

Proposal content: PASS. Submission completion: PARTIAL. No academic-content blocker was found. Prior dataset approval is waived as reported by the group; no formal approval is claimed. The remaining items concern student review, publication and LMS submission.

Audit basis: current handbook Part I, Sections 7.6 and 24-32, with Section 18 for the shared proposal fields; locked validation/remediation evidence. 27 independent document checks passed, including every class cell, exclusion arithmetic, unchanged figure bytes and preservation of 148 existing files. Dataset audits and model training were not rerun.

Mandatory criterion and handbook source	Status	Evidence or required action
Name source version license | 27 and 18	PASS	proposal PDF p. 1; primary and mirror differentiated; [4,5].
Task modalities inputs outputs | 27	PASS	proposal PDF p. 1; image-text pair and one five-class categorical target.
Paired counts and annotation types | 27	PASS	proposal PDF p. 1, 2; 7,938 selected pairs and per-modality source labels.
Five classes and about 5,000 pairs | 28.2	PASS	proposal PDF p. 2; five classes, 7,938 pairs; counts match all 15 source cells.
Genuine attachment alignment | 28.1	PASS	proposal PDF p. 3; QCRI tweet/image/path joins; no random pairing.
Missing noisy mismatched pairs | 27 and 28.1	PASS	proposal PDF p. 2, 3; 0% file/empty-text failures; source discrepancy and placeholder quarantine.
Distribution pair quality text length | 27 and 31	PASS	proposal PDF p. 2; old versus filtered EDA explicitly distinguished; Figure 1 captioned.
Split plan and entity isolation | 27 and 28.1	PASS	proposal PDF p. 3; transitive groups, test > dev > train filtering, no moved records.
Label mapping and exact exclusions | 3.1 and 27	PASS	proposal PDF p. 2, 3; 7 + 9 + 125 = 141; no silent relabelling.
Metrics | 27 and 29.3	PASS	proposal PDF p. 5; macro-F1 primary, accuracy, per-class metrics and confusion matrices.
Baselines and planned pretrained models | 27 and 29.1	PASS	proposal PDF p. 4; image, text, concatenation, gated fusion; ResNet-18 and DistilBERT.
Compute estimate | 27 and 18	PASS	proposal PDF p. 6; measured storage versus provisional costs; hardware access not asserted.
Subset rules | 27	PASS	proposal PDF p. 6; full primary data; training-only grouped/seeded smoke checks if used.
Method and controlled analysis roadmap | 29.2 and 30	PASS	proposal PDF p. 3, 4, 5; encoders, fusion, losses, training, fixed-gate ablation and interaction analysis planned.
Reproducibility and limitations | 4.2 and 5.5	PASS	proposal PDF p. 3, 6; fixed version, hashes and IDs; archive and 9/9 minority limits disclosed.
M1 scope and deadline | 7.6 and 7.7	PASS	proposal PDF p. 1, 6; 18 Nov 23:59 GMT+7; trained models/results staged for M2-M3.
Report AI disclosure | 5.1 and 5.2	PASS	proposal PDF p. 7; all nine fields; confirmed operator; model build and review limits transparent.

Mandatory criterion and handbook source	Status	Evidence or required action
Prior approval handling | 7.6 24.1 27 and group instruction	PASS	proposal PDF p. 1; group-reported waiver recorded; no formal approval fabricated or requested.
Student final verification | 5.5	PARTIAL	Nguyễn Huỳnh Nam Quốc is identified; completed student understanding/review is not attested by the assistant.
AI disclosure at all required locations | 5.1	PARTIAL	Proposal contains disclosure; current A3 repository log is newline-only. Landing/page/log updates remain required; no edits made.
Repository and Pages publication | 7.1	PARTIAL	Current A3 skeleton read; proposal/evidence publication not performed in this task, as instructed.
Registration and LMS format packaging upload | 1.1 and 7.1	PARTIAL	Private LMS state and current naming/packaging rules unverified. Confirm them and upload the final M1 files.

Remaining submission actions

1. Nguyễn Huỳnh Nam Quốc reviews and verifies the final proposal/disclosure before upload.
2. Publish/link the proposal and evidence; populate A3 AI disclosure and required locations.
3. Verify LMS registration and exact naming/format/packaging, then submit by 18 Nov 2026, 23:59 GMT+7.

Retain the disclosed qualifications: original archive equivalence is unproved; the cause of seven source-label differences is unresolved but quarantined; affected-individual support is only 9 dev / 9 test. These are stated limitations, not invented formal-approval gates.

M1 scope. Trained baseline results, improved-fusion results, ablation outcomes, slides, video and checkpoints are later-milestone deliverables under Sections 7.6-7.7; their absence does not fail M1. No repository/website edits, uploads or training were performed here.
